

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1. (Currently Amended) An integrated telephone system adapted to be housed in a seat of a mobile platform, the system comprising;

a housing;

a first terminal supported on said housing, said first terminal providing an electrical connection point for a telephone handset of said system and a first communication link to a remote transmitter of the mobile platform; and

a second terminal supported on said housing at a location readily accessible by a first user, said second terminal providing an electrical connection point for a computing device of said first user and a second communication link to the remote transmitter, said system adapted to provide the first and second communication links simultaneously.

2. (Currently Amended) The integrated telephone system of claim 1, further comprising a third terminal supported on said housing at a location readily accessible by a second user, said third terminal providing an electrical connection point for a computing device of said second user and a third communication link to the remote transmitter, said system further adapted to provide said first, second and third communication links simultaneously.

3. (Original) The integrated telephone system of claim 1, wherein said second terminal comprises an Ethernet interface and provides an Ethernet connection.

4. (Original) The integrated telephone system of claim 2, wherein said third terminal comprises an Ethernet interface and provides an Ethernet connection.

5. (Currently Amended) A seat mounted to a vehicle ~~having an integrated telephone system,~~ said seat comprising:

an integrated telephone system comprising:

a cradle mounted in a recessed portion of the seat;

a first terminal adapted to ~~be coupled~~ have a communication connection to a communication device and to provide a first communication link to a transmitter located remotely from said cradle, said first terminal located on said cradle; and

a second terminal adapted to ~~be coupled~~ have communication connection to a first computing device of a first user and to provide a second communication link to the remote transmitter, said second terminal located on said cradle, said integrated telephone system adapted to provide said first and second communication links simultaneously.

6. (Currently Amended) The seat of claim 5, wherein said integrated telephone system further comprising a third terminal adapted to ~~be coupled~~ to have a communication connection to a second computing device of a second user and to provide a third communication link to the remote transmitter, said third terminal located on said cradle, said integrated telephone system further adapted to provide to provide said first, second and third communication links simultaneously.

7. (Original) The seat of claim 5, wherein said communication device comprises a telephone handset.

8. (Original) The seat of claim 5, wherein said second terminal comprises a serial port interface.

9. (Original) The seat of claim 5, wherein said second terminal comprises a parallel port interface.

10. (Original) The seat of claim 5, wherein said second terminal comprises a USB interface.

11. (Original) The seat of claim 5, wherein said second terminal comprises a RJ-45 interface.

12. (Canceled).

13. (Currently Amended) The seat of claim 5, wherein ~~a communication link~~ said communication connection between said communication device and said first terminal comprises one of a hard-wired connection [[or]] and a wireless connection.

14. (Original) The seat of claim 5, wherein ~~a communication link~~ said communication connection between said first computing device and said second terminal comprises one of a hard-wired connection [[or]] and a wireless connection.

15. (Currently Amended) The seat of claim 6, wherein ~~a communication link~~ said communication connection between said second computing device and said third terminal comprises one of a hard-wired connection [[or]] and a wireless connection.

16. (Original) The seat of claim 6, wherein said third terminal comprises a RJ-45 interface.

17. (Withdrawn) A method for adapting an existing seat mounted telephone system with an additional terminal comprising the steps of:

modifying the telephone system to receive a portion of a first additional terminal having an interface;
affixing said first additional terminal to the telephone system; and
connecting a communications cable to said first additional terminal.

18. (Withdrawn) The method of claim 17, wherein said first additional terminal comprises a RJ-45 interface.

19. (Withdrawn) The method of claim 17, further comprising the steps of:
modifying the telephone system to receive a portion of a second additional terminal having an interface;
affixing said second additional terminal to the telephone system; and
connecting a communications cable to said second additional terminal.

20. (Withdrawn) The method of claim 17, wherein said first additional terminal comprises an Ethernet interface and the communications cable comprises an Ethernet cable.
